- **Hand-made with period materials and techniques**
- **16 Tribes from early to mid-1800s**
- **Comprehensive record of major tribes**

Once-in-a-Lifetime Collection

Bad Hand is a Native American historian who has devoted his life to learning about, and reliving as closely as possible, early Native American culture. Over his 40+ year career, he has worked to dispel many of the misconceptions, stereotypes, and historical inaccuracies of Native American culture. He has compiled an extensive research library and made historically accurate re-creations of garments and accoutrements related to the lifestyle and livelihood of the major Plains Indian Native American tribes. This is the world the Mountain Men entered in the first half of the 1800s at a time when both the outsiders and natives had something to offer each other and lived in cooperation with each other.
